Research experience

Telecom Paris Tech & Thales Communication and Security

Jan 2013 - ~ Jan 2016

PhD Candidate

Title : Smart gateways for low-power and lossy networks.

- Workflow for WSN reproducible research with an open source prototype <http://github.com/sieben/makesense>
- Worked on gateway caching proxy servers
- Active & passive monitoring of constrained networks
- Contiki (C), Java, Wireshark, numpy, matplotlib, pandas, IPython

(advisor : Jean-Louis ROUGIER, Vania CONAN)

Thales Communications & Security - Colombes

2012

Final year's internship

Design and implementation of a proxy server for low power and lossy networks with an adaptive cache policy that match lifetime constraints with acceptable network traffic

Contiki (C), Java, CouchDB (advisor : Jeremie LEGUAY, Paolo MEDAGLIANI)

CEA - DAM - Bruyères-le-Châtel

2010

Intern

Re-factored and debug of a Fortran nuclear physics application

gfortran, Sun OS, Red Hat Enterprise Linux, Shell (advisor : Thierry Granier)

Education

ENSIIE, Evry, France

2010 - 2012

Degree in Computer Science engineering

major in Operating Systems and Network Administration, Routing and Quality of service, Software certification and System Security.

Lycée Fénelon, Paris, France

2008 - 2009

Preparatory school (French CPGE)

major in Mathematics and Physics.

Knowledge and skills

Theory : Data Analysis, Database Design, Statistics, Optimization, Numerical Analysis ; language and compilation theory ; graphs and operational research

Administration : GNU/Linux : System and network administration, Computer Architecture, Operating System

Web : flask, django, nginx, CouchDB, PostgreSQL, redis

SCM : SVN, git, CVS

Scientific software : pandas, numpy, matplotlib, ipython, L^AT_EX, R, Octave (~ Matlab)

Virtualization : VirtualBox, Docker, Vagrant

Networking : Routing and Quality of Service, network architecture and protocols, Wireless, TCP/IP, VPN, Wireshark

Programming : C, Java, ASM (Intel, 68k), Python, OCaml, Shell, Concurrent Programming, several contributions to free software

Teaching

Type	Hours	Audience	Level	Language	Description
Tut/Lab	60.5h	~ 30 students	1st year eng.	FR	RES101 (BCI Réseaux)
Tut/Lab	18h	~ 10 students	International M2	EN	RES841 (Computer Networks)
Tut/Lab	21h	26 students	1st year eng.	FR	INF103 (Java programming)
TOTAL : 99.5 h

Projects and collaborations

Ongoing projects.....

Year	Name and funding source	Description and comments
since 2012	IRIS (ANR) http://www.anr-iris.fr	<i>All IP Networks for the Future Internet of Smart Objects</i>

Former projects.....

2011–2013	Calipso (EU/FP7) http://www.ict-calipso.eu/	<i>Connect All IP-based Smart Objects</i>
-----------	---	---

Community

- Multiple contributions on code quality and continuous integration in Contiki
- Support on open source mailing list
- IT administration in a science association (Paris Montagne)

Additional information

Languages : French (native), English (fluent), Spanish (high-school level),
