Application for International Mobility at the University Of Amsterdam

To whom it may concern,

My name is Juliette Piquard. I am a student at Polytech UPMC, majoring in Material Science. I am writing in order to apply for the chemistry master's degree at the University of Amsterdam.

This exchange program offers me the possibility of studying a new field of chemistry: the environmental chemistry. Indeed, the environmental studies and sustainable development are fields that have always interested me. Thus, I would like to develop my abilities in chemistry. I find that the offered master's degree matches my professional aspirations that are among others analytical sciences. It would be a chance for me to use this knowledge and learn more in this field. This would enhance my knowledge and skills in the field as I have already obtained a bachelor's degree in physics and chemistry

Finally, I am deeply interested by the opportunity given to students which allows them to study in a foreign country. The fact that this program is based out of the University of Amsterdam interests me as it would allow not only for academic pursuits, but cultural discovery as well. I believe that it would provide a rewarding experience in my professional environment in addition to helping me grow in my personal development.

Thank you for your consideration,

Juliette Piquard
